

# Software Defined [In Situ] Visualization

**Jim Jeffers, PE & Director, SW Defined Visualization, Intel Corporation**

**[james.l.jeffers@intel.com](mailto:james.l.jeffers@intel.com); Twitter: [@jamesljeffers](https://twitter.com/jamesljeffers)**

# SDVis Quick Recap

Intel supported community effort for high performance, high fidelity, in-situ CPU based rendering

- High, interactive performance for even *very large (TB+) datasets*
- Fully Open Source with liberal Apache 2 and MIT License
- Single Node and Cluster-wide Scalability in 1) Render Time; 2) Render Quality; 3) 3D Model Data Size
- OpenGL and Ray Tracing Support with shadows, ambient occlusion, up to photorealistic quality

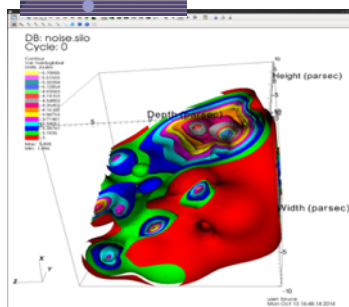

*Now broadly Integrated and tested with both general and targeted domain applications*

Ray Traced with OSPRay

Standard OpenGL Image

## Embree

- CPU Optimized Ray Tracing Algorithms
- 'Tool kit' for Building Ray Tracings Apps
- Broadly Adopted by 3rd Party ISVs
- More at <http://embree.github.io>

## OSPRay

- Rendering Engine Based on Embree
- API Designed to Ease Creation of Visualization Software
- More at <http://ospray.org>

## OpenSWR

- High Performance CPU Vis Rasterization
- Fully Integrated into MESA v12.0+ ParaView, VTK, VisIt, EnSight, VL3
- More at <http://openswr.org>

# OPENSWR/LLVMPIPE PERFORMANCE RATIO

# OPENSWR/LLVMPIPE PERFORMANCE RATIO

Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark\* and MobileMark\*, are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. For more information go to <http://www.intel.com/performance>.

# PERFORMANCE TEST PLATFORMS

Two machines:

- KNL: Intel® Xeon Phi™ CPU 7210 @ 1.30GHz, Ubuntu 17.10, 4.10.0-20-generic, gcc 6.3.0
- BDW: Intel® Xeon 2699v4 x 2 (44 cores) @ 2.20GHz, Ubuntu 17.10, 4.10.0-19-generic, gcc 6.3.0

Four tests:

- `manyspheres.py (-s 64 -r 726 -v 1920,1080)` – paraview benchmark script
- `waveletcontour.py (-d 256 -v 1920,1080)` – paraview benchmark script
- `TimingTests (-width 1536 -height 1536 -regex SurfaceColoredWithNormals -nochart -ss 14 -se 14)` – vtk benchmarking app
- `GLBenchmarking (--start 14 --end 14)` – vtk benchmarking app

# Ray Tracing Foundation: Embree Ray Tracing Kernel Library

Provides highly optimized and scalable ray tracing kernels

- Acceleration structure build and ray traversal
- Single Ray, Ray Packets(4,8,16), Ray Streams(N)

Targets up to photorealistic professional and scientific rendering applications

Highest ray tracing performance on CPUs

- 1.5–6× typical speedup reported by users

Support for latest CPUs / ISAs

- Intel® Xeon Phi™ Processor (codenamed *Knights Landing*) – AVX-512
- Intel® Xeon® Processor (codenamed Skylake) - AVX-512 (coming soon!)

API for easy integration into applications

Free and open source under Apache 2.0 license

- <http://embree.github.com>

# Rendering Engine for *High-Fidelity* Visualization

- Build on top of Embree; Launched June 2016
- Scalable Visualization targeted features
  - Surfaces (both polygonal and non-polygonal)
  - Volumes, and volume rendering
  - *High-Fidelity* rendering/shading methods
  - *Scalable* Cluster Wide Rendering
- Packed it up in an ‘easy-to-use’ rendering library for visualization
  - Same "spirit" as OpenGL, but different API
- 10+ Application adoption in 12 months, more under development!

# A TURNKEY SDVIS APPLIANCE SOLUTION

For:

**In Situ Compute+Vis!;** Vis Walls up to 6 UHD Displays; HPC Compute,  
Vis+HPC SW Development and EVEN Post-Processing Vis ☹

# Announcing the Turnkey SDVis Appliance!

Improving Data Visualization with Intel® Solutions

Optimizing for  
Visualization

Optimized for parallel processing and latest instruction sets  
OpenSWR, Embree, & OSPRay all available  
Used by ParaView, VisIt, VMD, CEI EnSight, and more...

Reducing Cost for  
Visualization

Lower cost of host vs cost of host + card for GPUs  
Single host can address up to 384GB memory  
Additional use as general purpose compute platform

Pre-Configured  
Appliance Solution  
Available Now

1.58x to 1.91x better performance than GPUs<sup>1</sup>  
Supports data sets up to 1.5TB  
Standard configuration price \$79,000<sup>2</sup>  
More Info: <http://sdvis.xeonphi.com/>

## For in-situ, post-processing, and professional rendering visualization needs

\*Other names and brands may be claimed as the property of others.

<sup>2</sup>Pricing as of June 15, 2017. Pricing is subject to change without notice

<sup>1</sup>Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark and MobileMark, are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. Configuration Details: See slide 5.

# SDVis Appliance Solution

## Appliance Configuration

**Installed Software** Intel® HPC Orchestrator, SDVis Software (ParaView, VTK, VisIt, VMD), Intel® Parallel Studio Cluster Edition, SW Dev. Tools

**Nodes** 8x Intel® Xeon Phi™ 7250 compute nodes, Intel® Xeon® E5-v4 head node, Intel® Xeon® E5-v4 storage node

**Storage** 32TB Raid

**Network** 24 port Omni-Path & Ethernet switches

## Availability & Pricing

Available 4 weeks after ordering

Price \$79,000 (1 year SW subscriptions)<sup>1</sup>

## Ordering & More Info

<http://sdvis.xeonphi.com/>

## SDVis Appliance

### Master Head Node Node + Display Management

**Software:** CentOS 7.3, HPC Orchestrator

**Hardware:** 1 CX-87723 Intel® Xeon® Node  
Intel® Xeon® E5-v4 36 cores, 256GB DDR4, OPA HFI,  
Up to 6 4K Monitors Display Card, SSD 480GB

### Compute Nodes Compute + Render

**Software:** CentOS 7.3, SDVis Software (ParaView, VTK, VisIt, VMD), Intel Parallel Studio Cluster Edition, SW Dev. Tools

**Hardware:** 8 CX-87719 Intel® Xeon Phi™ Nodes  
Intel® Xeon Phi™ 7250 68 cores, 192GB DDR4, Intel® OPA HFI, SSD 150GB

### Storage System

**Software:** CentOS 7.3

**Hardware:** 1 CX-87794 Intel® Xeon® Node  
Intel® Xeon® E5-v4 16 cores, 64GB DDR4, Intel® OPA HFI, 32TB RAID

### Networking OPA/100G Ethernet

**Hardware:** 24 Port OPA Edge Switch, 16 Port Ethernet Switch

Pre-configured solution for visualization needs

\*Other names and brands may be claimed as the property of others.

<sup>1</sup>Pricing as of June 15, 2017. Pricing is subject to change without notice

# SDVis Appliance

Includes all the necessary software for visualization and rendering, node management, and software development

Address up to 1.5TB data sets using 8 Intel® Xeon Phi™ 7250 68 core compute nodes

Intel® Xeon® E5-v4 36 core management node

Intel® Xeon® E5-v4 16 core storage node with 32TB RAID storage

Features Intel® Omni-Path interconnect fabric

## Available Now!

The SDVis Appliance is more than just a good idea, it is available now from Colfax International. For more information use the links below.

## 14U Rack

**Software:** SDVis Software (ParaView, VTK, VisIt, VMD), Intel® Parallel Studio XE Cluster Edition, Intel® HPC Orchestrator, SW Dev. Tools

24 port Ethernet Switch

24 port Intel® Omni-Path Switch

Intel® Xeon® Management Node

4x Intel® Xeon Phi™ Compute Nodes

4x Intel® Xeon Phi™ Compute Nodes

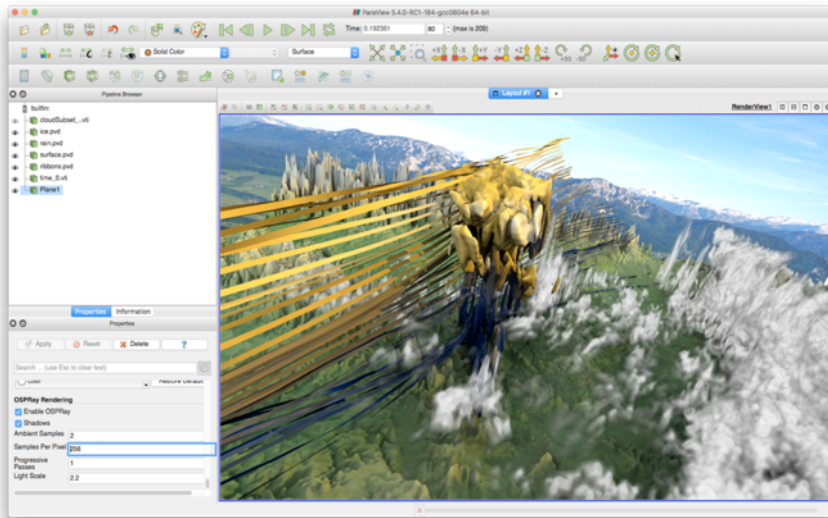

Intel® Xeon® Storage Node (32TB RAID)

Power Distribution Unit

# Notices and Disclaimers

Intel does not control or audit third-party benchmark data or the web sites referenced in this document. You should visit the referenced web site and confirm whether referenced data are accurate.

For more complete information about performance and benchmark results, visit [www.intel.com/benchmarks](http://www.intel.com/benchmarks).

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Learn more at [intel.com](http://intel.com), or from the OEM or retailer.

The cost reduction scenarios described are intended to enable you to get a better understanding of how the purchase of a given Intel based product, combined with a number of situation-specific variables, might affect future costs and savings. Circumstances will vary and there may be unaccounted-for costs related to the use and deployment of a given product. Nothing in this document should be interpreted as either a promise of or contract for a given level of costs or cost reduction.

Optimization Notice: Intel's compilers may or may not optimize to the same degree for non-Intel microprocessors for optimizations that are not unique to Intel microprocessors. These optimizations include SSE2, SSE3, and SSSE3 instruction sets and other optimizations. Intel does not guarantee the availability, functionality, or effectiveness of any optimization on microprocessors not manufactured by Intel. Microprocessor-dependent optimizations in this product are intended for use with Intel microprocessors. Certain optimizations not specific to Intel microarchitecture are reserved for Intel microprocessors. Please refer to the applicable product User and Reference Guides for more information regarding the specific instruction sets covered by this notice. Notice Revision #20110804.

No computer system can be absolutely secure.

Intel® Advanced Vector Extensions (Intel® AVX)\* provides higher throughput to certain processor operations. Due to varying processor power characteristics, utilizing AVX instructions may cause a) some parts to operate at less than the rated frequency and b) some parts with Intel® Turbo Boost Technology 2.0 to not achieve any or maximum turbo frequencies. Performance varies depending on hardware, software, and system configuration and you can learn more at <http://www.intel.com/go/turbo>.

Intel processors of the same SKU may vary in frequency or power as a result of natural variability in the production process.
